

Helm CONNECT

# Compliance

Eliminate paper forms, ensure version control of documents, and manage audits and corrective actions in one system.

- Centralize all your safety management workflows in a single system
- Ensure your asset certifications are up-to-date and you're ready to prove compliance at any time
- Create custom forms and publish them to the crew on your assets
- Distribute important documents to the crew on your assets
- Use version control to ensure your crew always have the latest revision of each form or document
- Manage your entire audit process including non-conformities and corrective actions
- Use dashboards to track work status and due dates across your fleet

*"We switched over to Helm because it is the most user friendly vessel operations software program I have come across and I think we have demoed or used in combination all of them. We also chose Helm because they seem to have the best support."*

**- John Stewart**  
Vice President, Magnolia Fleet

# Centralize all your safety management workflows in a single system.

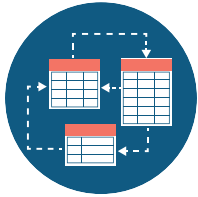

### Build, maintain, and distribute your own custom forms

- Replace paper forms onboard your assets
- Create your own custom forms and publish them to your assets
- Use version control to ensure your assets always have the latest revision of each form
- Report on and track completion of all scheduled forms

### Distribute important documents to the crew on your assets

- Distribute key PDF documents and attachments from shore to the crew on your assets
- Use version control to ensure your crew can only access the most up-to-date documents
- Track when updated documents are received and acknowledged
- Maintain a searchable archive of historical documents

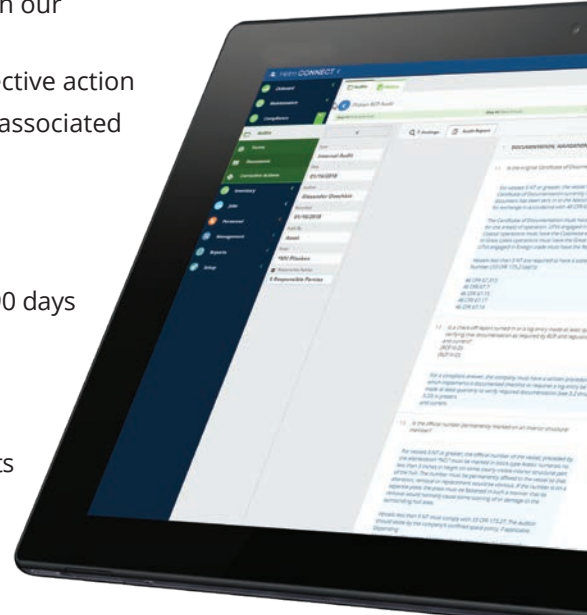

### Easily manage your entire audit process

- Build custom audit templates
- Schedule and track your internal and external audits with our easy-to-use audit dashboard
- Manage your list of findings and assign each one a corrective action
- Maintain a full history of all completed audits, including associated findings and corrective actions

### Prove your asset certifications are up-to-date

- Track all the certifications for your assets
- Clearly see which items will be due in the next 30, 60, or 90 days
- Configure email reminders about items coming due
- Maintain a complete, searchable record of the items for each asset, including attached documents
- Prove compliance at any time from shore or on your assets
