

Helm CONNECT
Jobs

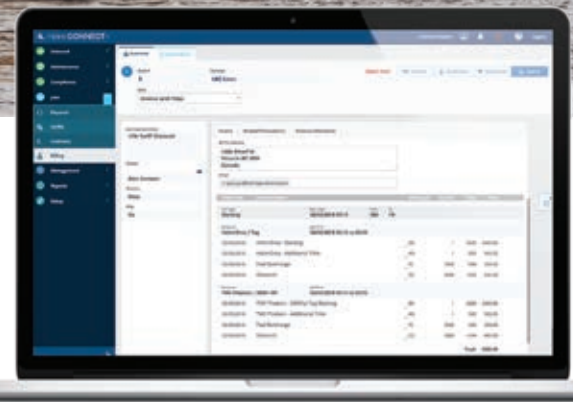

Schedule your assets, manage and track multiple divisions, and generate billing.

- Use a single, integrated solution to manage your jobs, from planning and scheduling to invoicing and revenue reporting
- Reduce the time from order to invoice with real-time communication between shore and your assets
- Capture lost revenue due to missed surcharges with our flexible billing engine
- Streamline workflows by customizing the interface for each role in your organization
- Allow managers to view data across multiple ports or regions
- Track competitor jobs and perform competitor analysis

"We switched over to Helm because it is the most user friendly vessel operations software program I have come across and I think we have demoed or used in combination all of them. We also chose Helm because they seem to have the best support."

- **John Stewart**
Vice President, Magnolia Fleet

A single, integrated solution for managing jobs from planning to invoicing and revenue reporting.

Track and report on all crew and asset activities

- Replace your log book with customized logs based on your organization's requirements
- Report on the event logs and activities submitted across your fleet
- Create customized log templates for each division
- Use custom fields in your log templates
- Track and report on unplanned events

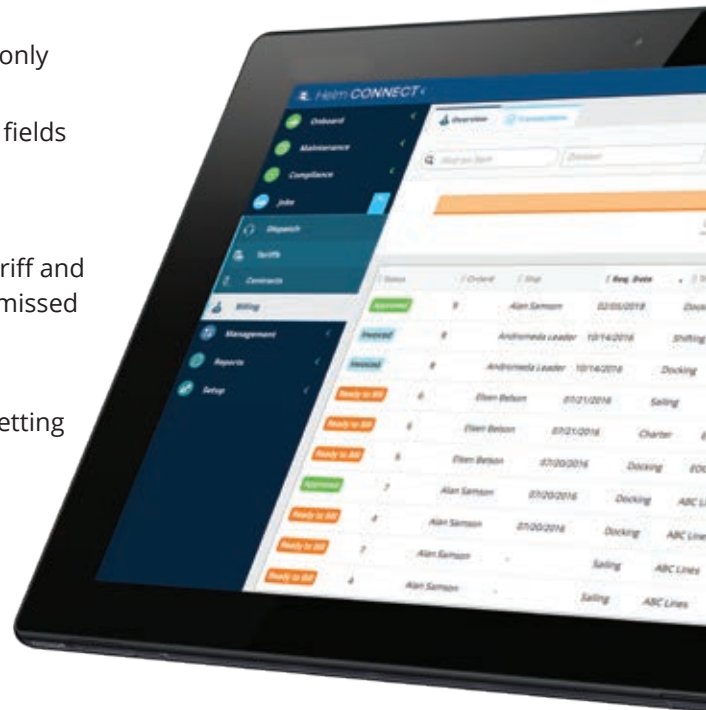

Plan, schedule, dispatch, and track all your jobs in real time

- Stay in constant communication with your assets
- Manage your orders and assets in a time bar or in a compact, data-driven grid
- Automatically convert estimated times to actuals as critical order times are logged by your crew
- Use templates to streamline your most commonly performed tasks
- Use flexible grid layouts and powerful custom fields to only see the information you need

Capture all possible revenue

- Use our powerful billing engine and flexible tariff and contract entry to eliminate lost revenue from missed surcharges
- Create customized invoice and credit styles
- Separate duties along the billing life cycle by setting up specific roles with permission to approve billing, create invoices, issue reversals, etc.
- Use the Helm CONNECT API to integrate with external AR systems
