

Helm CONNECT

# Maintenance

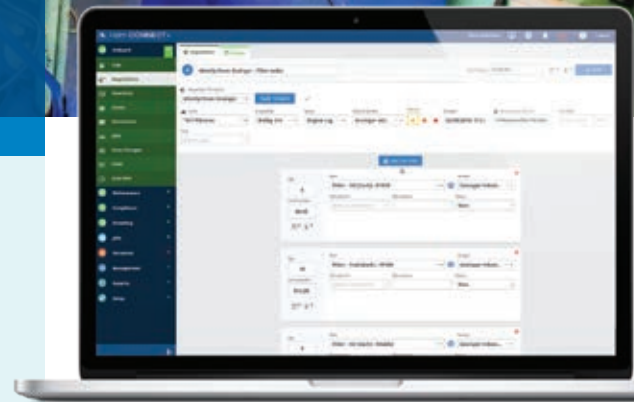

Mitigate unplanned breakdowns and create consistent, efficient, and compliant maintenance routines.

- Create and manage a custom planned maintenance system for your entire fleet
- Base your scheduled routines and inspections on engine hours, dates, or both
- Create tasks for your crew as needed or from failed items in maintenance routines
- Make data entry and work management easy for your crew with a simple, intuitive interface
- Use dashboards to track work status and due dates across your fleet
- Manage part and component inventories in warehouses and on your assets
- Manage requests for parts and services for your assets

*"We chose Helm CONNECT because they [Helm] made it easy to do business with them. First off, their maintenance and compliance software is the easiest we've ever seen, and secondly we didn't have to wait weeks to get a price quote from them. They've been transparent and responsive throughout the entire process."*

- **Anthony Roberts**  
Manager of Marine Traffic / Operations, Louisiana International Marine

# Create and manage a custom planned maintenance system for your entire fleet.

### Quickly and easily create tasks for your crew

- Assign tasks to individuals on your assets or on shore
- Use email notifications to alert individuals that they've been assigned work
- View dashboards to easily track the status and due dates of tasks

### Create recurring inspections and maintenance routines

- Base your schedules on engine hours, dates, or both
- Easily update your maintenance program to ensure your assets always have the most up-to-date routines
- Provide simple to do lists on your assets to make work management easy for your crew
- Automatically create tasks from deficiencies found during inspections or maintenance routines
- Track and report on overdue items to ensure your crews are staying compliant

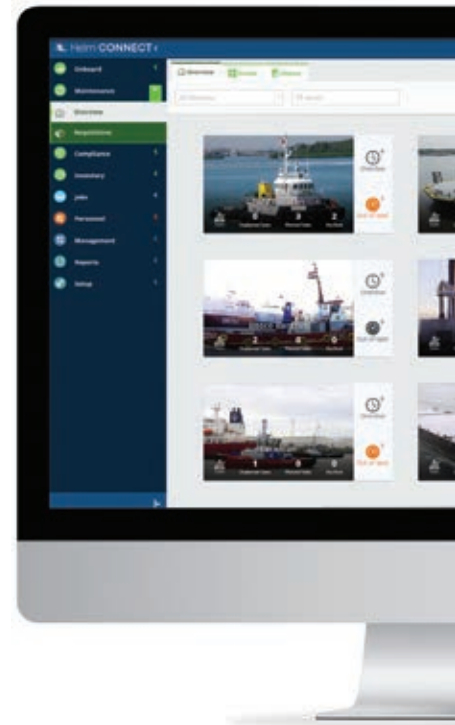

### Better manage requests for your parts and services

- Increase visibility by tracking the status of your requisitions both from shore and on your assets
- Use vendor price contracts to quickly estimate the cost of your requisitions
- Link your requisitions to existing tasks

### Simplify inventory tracking

- Manage part and component inventories in warehouses and on your assets
- Easily transfer parts and components between assets
- Track part usage through deductions on maintenance tasks
- Simplify the request process between your crew and shore
- Link requests for parts and services to maintenance tasks
