

Helm CONNECT :: Jobs

Meet Event Logs

Track and report on the activities and events carried out by your vessels and their crew.

- Replace your log book with customized logs based on your organization's unique reporting requirements
- Report on the event logs and activities submitted across your fleet
- Create customized log templates for each division
- Use custom fields in your log templates to record anything from vessel location to cargo temperature
- Track and report on unplanned events, such as standby time during a job
- Easily schedule and trigger maintenance, inspections, and surveys based on the activities logged by your crew
- Automatically trigger forms based on log events such as incidents, near-misses, and drills

"We switched over to Helm because it is the most user friendly vessel operations software program I have come across and I think we have demoed or used in combination all of them. We also chose Helm because they seem to have the best support."

- **Joshua Vanasse**
Assistant Engineer, Curtin Maritime
