

Helm CONNECT: Compliance

# Meet Asset Tracking

Ensure your asset certifications are up-to-date and you're ready to prove compliance at any time.

- Track all the certifications for your assets
- Clearly see which items will be due in the next 30, 60, or 90 days, or set your own custom lead times
- Configure email reminders about items coming due
- Maintain a complete, searchable record of the items for each asset, including attached documents
- Prove compliance at any time from shore or on your assets

*We (TBS) chose to work with Helm [to deliver our compliance management] because their software is the best fit for our customers. The flexibility of Helm CONNECT lets us easily tailor the system to our way of managing safety and compliance, plus the efficiency of using software instead of paper will net many benefits for our customers."*

- **Patrick Boles**  
Managing Director of  
Tug and Barge Solutions
