

Helm CONNECT: Maintenance

Meet Inventory

Track part and component inventories across your assets, manage part usage, and simplify request tracking.

- Manage part and component inventories in warehouses and on your assets
- Easily transfer parts and components between assets
- Track part usage through deductions on maintenance tasks
- Simplify the request process between your crew and shore
- Link requests for parts to maintenance tasks

"We were hesitant to purchase Helm because it was something new, something completely different for us. However, using Helm CONNECT has forced us into better practices. We now have written inventory of all our moving parts. Before this was kept in a few key people's heads. With that information readily available to all who need it, we can time preventative maintenance better and better forecast budget for repairs and maintenance."

- **Gene Bergson**
Executive Vice President,
Fleet and Marine Services
