

Helm CONNECT: Maintenance

Meet Tasks

Assign vessels, departments, or individual crew members work that needs to be done either ad hoc or in response to a failure in the system.

- Assign tasks to individuals on your assets or on shore
- Set up email notifications to alert individuals when they've been assigned work
- View dashboards to easily track the status and due dates of tasks
- Attach images and documents for your crew to reference
- Report on tasks to ensure they're being completed on time

"We chose Helm CONNECT because they [Helm] made it easy to do business with them. First off, their maintenance and compliance software is the easiest we've ever seen, and secondly we didn't have to wait weeks to get a price quote from them. They've been transparent and responsive throughout the entire process."

- **Anthony Roberts**
Operations Manager
of Marine Traffic, Louisiana
International Marine
