

Helm CONNECT: Maintenance

# Meet Planned Maintenance

Create recurring inspections and maintenance routines and track completion of the work.

- Base your schedules on engine hours, dates, or both
- Easily update your maintenance program to ensure your assets always have the most up-to-date routines
- Provide simple to do lists on your assets to make work management easy for your crew
- Automatically create tasks from deficiencies found during inspections or maintenance routines
- Track and report on overdue items to ensure your crews are staying compliant

*"We chose Helm CONNECT because they [Helm] made it easy to do business with them. First off, their maintenance and compliance software is the easiest we've ever seen, and secondly we didn't have to wait weeks to get a price quote from them. They've been transparent and responsive throughout the entire process."*

- **Anthony Roberts**  
Manager of Marine Traffic / Operations, Louisiana International Marine
