

TRAIN TRACK REPORT

INTEGRATED PARTNER

Helm CONNECT can now integrate with the Moxie Media Learning Management System (LMS)

With this integration, users who complete courses in Moxie Media's extensive training library will have their status automatically updated in Helm CONNECT.

This means that:

- Users spend less time moving between systems – having to leave your operational software results in an inefficient and cumbersome workflow. This integration allows you to seamlessly view personnel training progress without having to navigate away from Helm CONNECT.
- Audits are easier than before – as the integration data is pushed out to vessels, captains can prove to auditors the training status of specific crew, saving time and ensuring compliance.

The Helm CONNECT and Moxie Media LMS integration saves time, streamlines workflows and provides a better auditing experience.

To get started or to learn more, contact your account manager today!

Moxie Media is a leader in developing online training courses for the maritime industry to meet safety, health, security, maintenance, and regulatory compliance mandates such as Sub M, USCG, and IMO.

Moxie's flexible, onboard LMS, along with its library of hundreds of titles, streamlines training delivery and automates recordkeeping for your entire team.
